

Head of Logistics In-Land

Description

Our client is a major company specializing in animal health services, import, formulation, development and sales of premixes, additives, and ingredients essential for animal nutrition. It is a major subsidiary of one of the leading European Groups of Companies in Nigeria and operates currently from Abuja and Ogun State.

The successful candidate will be responsible for :

Responsibilities

1. Management of domestic logistics activities

- The HLIL is the manager of all in-land logistics operations, between all the company's sites, its suppliers and customers. It covers all goods flows in Nigeria within and inter company's sites.
- He supervises and controls the main logistics missions :
 - Organization, management and control of all incoming products flows by sea
 - Management, and monitoring of stocks (stocks inventories) in each distribution center with the support of the warehouse keepers of Abuja and Abeokuta
 - Transport supervision and control of all the domestic flows/movements of products
 - Reception, dispatch and delivery between the different storage points, the domestic suppliers and the customers.
- He ensures compliance and the follow-up of the necessary actions within the warehouses to guarantee compliance with administrative and legal requirements (would be in charge of supervising the NAFDAC works necessary in the warehouses for the re-bagging).

2. Logistics teams' Management

- He manages all the team directly linked to in-land logistics operations (from the arrival of imported products to delivery to customers) :
 - Warehouse keeper of Abuja
 - Warehouse keeper of Abeokuta
 - Transport manager.
- He manages all the team indirectly linked to in-land logistics operations (from the arrival of imported products to delivery to customers):
 - Delivery drivers
 - Handling team
- He has supervisory and coordination functions, and is in direct contact with the Import, Finance and sales department of the company, as well as with the external services providers.

3. Logistics Strategy

- He is responsible for designing and organizing logistics strategies with the purpose of ensuring the flow of products and goods from their arrival at the dock in Nigeria (or from suppliers in Nigeria) until their distribution.
- He operates with a constant desire to optimize quality/costs/deadlines
- He supervises on the possible outsourcing of storage and transport with the
